Many of our clients prefer a low-key, private, anonymous location, where they can create, work and relax without the interference of fans and on-lookers. *Farview Recording* is easily able to accommodate even the most private of artists. Seven acres surround the studio itself... and usually, the only on-lookers are a few resident feral barn cats, raccoons or red-tailed hawks.

And for those who prefer an entourage of supporters, Farview Recording has plenty of space for vehicles and a comfy lounge for guests.
