

WHO AND WHAT WE ARE

Farview Recording is not an inhuman entity. It is, rather, the heart and soul of its founder and chief engineer, Jay Walsh, and his co-owner and operations manager, Kristin Joy. Together they maintain principles that have made Farview Recording the premier recording studio, and creator of Rock Drums sample CDs, that it is known for.

The Principles

“Do unto others as you would have others do unto you.”

This means that we maintain a rigid degree of honesty and integrity. We are firm believers that our customers and clients deserve a quality product or service at a reasonable, competitive, fair price. Why? Because that is what we, ourselves, wish to receive from those with whom we do business. We treat others as we expect to be treated. And advice should be free. Farview Recording helps others to achieve their highest good because it is the right and noble thing to do.

“As ye sow, so shall ye reap.”

This means that if Farview Recording sows “seeds” of honesty, trust, fairness, quality, warmth, integrity, loyalty, etc., then we will reap rewards - the “rewards” being happy, satisfied clients who are thrilled with the product(s) or service(s) they have received from Farview Recording. And that is what makes Farview Recording happy. We believe it’s an entirely win-win situation.

“Wish for others what you wish for yourself.”

This means that Farview Recording wishes others success, peace, happiness, contentment, health and prosperity, amongst countless other qualities of life. Why? Because these are the things that we wish for ourselves. And this is just another reason why Farview Recording only offers quality products and services at a fair, competitive price. We maintain a friendly, warm environment at Farview Recording - there’s nothing worse for an artist than being stuck in a sterile, cold place with aloof staff. Definitely not conducive to artistic expression and creativity!

“Harm none.”

Sages have shared the treasure of this tenet for thousands of years, and it is just as valuable and pertinent today as ever before. To us, it means that we expect every client to be fully satisfied with his or her Farview Recording experience. Anything less is simply unacceptable. Again, our client’s highest good is Priority #1.

Engineers and musicians the world round have sung the praises of Farview Recording and its Rock Drums sample CDs: from the major studio engineer to the small, independent engineer; from the major-label-signed musician to the not-yet-signed band and everyone in between receives the same courtesy and respect at Farview Recording.

And all our clients give Farview Recording the thumbs up. Farview Recording is interested in your success, your highest good and your satisfaction...and we take your project personally.
